

Bachelor of Electrical Engineering Practice Test Questions and Answers

1. What is the unit of electrical resistance?

- A) Ampere
- B) Volt
- C) Ohm
- D) Watt

2. In a series circuit, what happens to the total resistance when more resistors are added?

- A) Total resistance decreases
- B) Total resistance increases
- C) Total resistance remains the same
- D) Total resistance becomes zero

3. What does AC stand for in electrical engineering?

- A) Automatic Control
- B) Alternating Current
- C) Analog Circuit
- D) Active Component

4. What is the primary function of a transformer in electrical systems?

- A) To convert AC to DC
- B) To amplify electrical signals
- C) To change voltage levels
- D) To store electrical energy

Answers: 1-C 2-B 3-B 4-C
